500VA Rugged, Industrial Quality Fan Cooled DC/AC Inverter with Sine Wave Output CSI 500F-FXW Series

- Sinusoidal output voltage
- Rugged field-proven design
- Filtered input
- Cooling by internal fans
- Full electronic protection
- Field-proven design topology

This rugged, industrial quality DC/AC inverter utilizes field proven, microprocessor controlled high frequency PWM technology to generate the required output power with pure sine wave output voltage. It is a mature design with a track record in numerous applications. The DC/DC input stage boosts the input voltage to a higher DC voltage, which feeds the DC/AC inverter to generate the required AC output. High frequency conversion enables a compact construction, low weight and high efficiency. The input and output are filtered for low noise. High quality built-in fans provide sufficient airflow for operation without de-rating within the specified temperature range. The fans draw air into the unit, and exhaust at the opposite side of the unit. All heat generating components are installed on aluminum heatsink blocks which are thermally connected to the base plate. This also ensures exceptional mechanical ruggedness. Conformal coating provides protection against humidity and airborne contaminants. Full electronic protection, low component count, large design headroom, and the exclusive use of components with established reliability contribute to a high MTBF. The unit is manufactured at our plant under strict quality control.

SPECIFICATIONS

Input Voltage

24V, 36V, 48V or 125Vdc ±15% are standard Consult factory for other inputs, and range

Input Protection

Inrush current limiting
Varistors
Reverse polarity protection
Internal safety fuse
Lower voltage than the specified
minimum input will not damage
the unit

Isolation

1000Vdc input to chassis 3000Vdc input to output 2250Vdc output to chassis Output neutral is connected to the chassis on the terminal block. The jumper can be removed for floating output

Standards

Designed to meet C22.2 No. 107.1 - 01, UL 458 and EN60950-1

ЕМІ

EN 55032 Class A with margins

Output Voltage

115Vac/4.3A continuous, 60Hz or 400Hz or 230Vac/2.17A continuous, 50Hz Consult factory for other output requirements

Output Wave Form

Sinusoidal

Total Harmonic Distortion

Less than 5% at full load

Line/Load Regulation

 \pm 3% from no load to full load

Load Crest Factor

2 at 90% load

Output Noise

High frequency ripple is better than 500mVrms (20MHz BW)

Output Overload Protection

Current limiting with short circuit protection
Thermal shutdown with automatic recovery in case of insufficient cooling

Output Overvoltage Protection

140Vac (for 115Vac output) or 280Vac (for 230Vac output) by internal supply voltage limiting

Efficiency

Typically 80% at full load depending on input/output configuration

Operating Temperature Range

0°C to +50°C for full specification Extended temperature ranges available

Temperature Drift

0.05% per °C over operating temperature range

Cooling

By built-in high quality fans and conduction via baseplate

Environmental Protection

Basic ruggedizing Conformal coating Heavy ruggedizing available as option

Shock/Vibration

IEC 61373 Cat 1 A&B

Humidity

5 - 95% non-condensing

MTBF

Min. 130,000 hours at 45°C fans excluded
Demonstrated MTBF is significantly higher

Indicators

None

Control Input

None

Remote shutdown as option

Alarm Output

None

Option: output fail alarm (Form C)

Package/Dimensions (WxHxL)

FXW: 185 x 66 x 358 mm 7.3" x 2.6" x 14.1" including connectors and flanges

Weight

3kg (6.6 lbs)

Connections

12-pole barrier type terminal block with 3/8" spacing

RoHS Compliance

Compliant

Warranty

Two years subject to application within good engineering practice

Terminal Block Pin-out

| AC OUTPUT | | | | | | | GND | V DC INPUT | | | |
|-----------|---|-------------|-------------|-------------|-------------|-------------|-----|-------------------|----|----|----|
| L1 | | NOT USED | NOT USED | NOT USED | NOT USED | NOT USED | ÷ | ı | - | + | + |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |

Please note that ABSOPULSE power supplies are designed and built to customer specifications. The specifications on this data sheet are generic and will vary depending on input/output configuration and other customer requirements. Generic specifications are subject to change.

Designer and manufacturer of quality ac-dc power supplies and battery chargers, converters, inverters, dc-output UPS systems, complete rack mount systems and DC-input fluorescent lamp inverters since 1982. Custom or standard. Absopulse is a BABT-approved Facility.
